

[User Manual](#) 

HPTBBU-04 is a Battery Backup Unit is compatible with RocketRAID 3xxx/4xxx Series Adapters. It maximizes data protection without sacrificing performance. The HPTBBU-04 enhances controller performance and increases SATA and SAS storage system reliability by offering a unique set of data protection and data recovery features, combined with a BBU.

The RocketRAID uses both controller cache and disk cache during SATA RAID operations, which strengthens array performance during optimal usage as well as degraded RAID 5 or RAID 6 operations including faster rebuild times.

BBU-04 Specification

- Detection of BBU (Present or Disconnect) in controller BIOS and Web GUI.
- Monitor the status of BBU when charging and discharging.
- Monitor the percentage of charge present in the BBU.
- Monitor the health status (temperature and voltage) of the BBU.
- (Five Status Indicators: Ok, High, Low, Too High, Too Low)
- Warning indicator and alter with alarm buzzer for low charge.
- Recharging and charging time for BBU (from empty to full) will be within 30 hours.
- Support up to 48 hours for data protection.
- Compatible with all of RocketRAID 35xx and RocketRAID 4xxx series.

Kit Contents

- 1 x BBU-04 battery
- 1 x 8pin cable.
- 1 x Low Profile Bracket
